

The following career opportunities are available at the Alberta Geological Survey:

Geological Engineer - #05-113

The successful candidate will develop and lead a long term technical program on geo-hazards at Turtle Mountain. Responsibilities include overall technical delivery and project management, co-ordination with an advisory board of government and local stakeholders, management of technical experts and outside consultants.

Engineer or Geologist - #05-112

This role will encompass the operational logistics and maintenance of the geo-hazard system at Turtle Mountain. Responsibilities include ongoing and real-time system operation as well as continuation of project engineering and geology studies.
