

## New Scholarships Added for 2009 In Memorial Foundation Awards

Three more Canadian women will have their dream of becoming an engineer supported by a prestigious scholarship, thanks to the Canadian Engineering Memorial Foundation's partnership with Vale Inco.

New for 2009, Vale Inco has joined with CEMF to offer three \$10,000 undergraduate engineering scholarships to women studying in an accredited program in Canada, says a foundation news release. Each scholarship also comes with a summer job opportunity. These new scholarships will mean a total of 14 scholarships will be offered by the foundation for women in engineering at the undergraduate, master's and PhD levels. All applications and criteria are available now online at [www.cemf.ca](http://www.cemf.ca). But the deadline is near – Jan. 16, 2009.

Undergraduates can apply for one of the five \$5,000 CEMF undergraduate engineering scholarships. One scholarship is given in each region of Canada – Atlantic, Quebec, Ontario, the Prairies and B.C.

There are also two, \$2,500 IBM undergraduate engineering scholarships available for women studying in an accredited electrical, computer, software or computer systems design engineering program. These scholarships also come with a summer job opportunity.

A \$5,000 AMEC Aboriginal undergraduate engineering scholarship is offered to a Canadian Aboriginal woman studying engineering in an accredited program.

At the master's level, there's the \$10,000 Vale Inco scholarship and the \$10,000 AMEC scholarship. Both are open to women studying in any field of engineering. Both scholarships come with a summer job opportunity.

Finally, there is the \$15,000 Claudette MacKay-Lassonde Scholarship offered to a woman working on her PhD in engineering.

All scholarships are awarded based on leadership, extracurricular activities and the ability to act as a role model for other women to pursue a career in engineering, rather than on academic achievement.
