## **APEGGA EDUCATION FOUNDATION SCHOLARSHIPS AND AWARDS**

The APEGGA Education Foundation was established on 1996 as a registered charitable organization. One of its mandates is to support those activities of the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA), which are aimed at enhancing the education and development of its members and potential members. Further, APEGGA encourages, through teacher awards, teachers throughout the province who demonstrate exceptional abilities in the teaching of science and math.

APEGGA and its 40,000 members are committed to advancing the study of science and math at all educational levels. The Association provides the following support to educators and students in Alberta.

- input into the development of math and science curricula
- volunteers who provide in-class science demonstrations
- judges for regional and local science fairs
- career counselling information on engineering, geology and geophysics
- awards and scholarships
- support and/or sponsorship of science competitions like the Edmonton Science Olympics

Established in 1920, The Association serves society by regulating, enhancing and providing leadership in the practice of the professions in Alberta. APEGGA's authority for this is by statute of the province of Alberta, The Engineering, Geological and Geophysical Professions (EGGP) Act. Under the EGGP Act, licensure with APEGGA is required to practice engineering, geology or geophysics in the province of Alberta. APEGGA also raises awareness of the importance of science and technology, with an emphasis on the member professions, through its communications and career counselling activities.
